AI-Generated Narrative

The CivAIHC initiative represents a strategic effort to leverage digital transformation for sustainable development, addressing the critical requirement for dedicated funding to scale its operational impact. As global landscapes shift toward data-driven governance and civic-oriented technological solutions, initiatives like CivAIHC are essential to ensure that advancements in artificial intelligence and digital infrastructure translate into tangible benefits for local communities. This project aligns with the international consensus that “digital technologies are dramatically transforming our world. They offer immense potential benefits for the well-being and advancement of people and societies and for our planet. They hold out the promise of accelerating the achievement of the Sustainable Development Goals” (GDC, p. 1). By focusing on the intersection of civic engagement and emerging technology, CivAIHC seeks to bridge existing gaps in technology access and application, fostering a more resilient and inclusive digital ecosystem.

To achieve these objectives, CivAIHC emphasizes the importance of collaborative frameworks and equitable access to digital tools. The project aims to mobilize resources to strengthen digital capacity and human capital, ensuring that the benefits of innovation are not restricted by geographic or economic barriers. This approach mirrors the core principles of the Global Digital Compact, which asserts that “the inclusive participation of all States and other stakeholders is the cornerstone of this Compact. Our cooperation will close the digital divides within and between States and advance an equitable digital environment for all” (GDC, p. 8a). Through targeted investment and multi-stakeholder engagement, CivAIHC is positioned to contribute to a secure, human-centric digital future that prioritizes the empowerment of individuals and the fulfillment of the 2030 Agenda for Sustainable Development.

* Closing the digital divide through inclusive participation and equitable access. * Harnessing digital technologies and AI to accelerate the Sustainable Development Goals. * Strengthening multi-stakeholder cooperation to advance a safe and secure digital future. * Scaling up international cooperation and financing for digital capacity development.

Selected Global Digital Compact Alignments

Trust, Safety, & Integrity › Multi-Stakeholder & Global Cooperation

“Governments, the private sector, civil society, the technical community, academia and international and regional organizations, in their respective roles and responsibilities, are essential to advance an inclusive, open, safe and secure digital future. Our cooperation will be multi-stakeholder and harness the contributions of all.” (GDC, p. 8k)

Ratified Global Principle

Digital Infrastructure & Governance › International & Multilateral Engagement

“Digital technologies are dramatically transforming our world. They offer immense potential benefits for the well-being and advancement of people and societies and for

our planet. They hold out the promise of accelerating the achievement of the Sustainable Development Goals.” (GDC, p. 1)

Ratified Global Principle

Digital Infrastructure & Governance › International & Multilateral Engagement

“We recognize the urgent need for strengthened data governance cooperation at all levels with the effective, equitable and meaningful participation of all countries and in consultation with relevant stakeholders to unlock the full potential of digital and emerging technologies. We recognize that this will require capacity-building for developing countries and the development and implementation of data governance frameworks at all levels that maximize the benefits of data use while protecting privacy and securing data. We call on the United Nations system to play a role in promoting capacity-building for responsible and interoperable data governance.” (GDC, p. 38)

Ratified Global Principle

Digital Infrastructure & Governance › Environmental Sustainability in Digital Systems

“We call on standards development organizations to collaborate to promote the development and adoption of interoperable artificial intelligence standards that uphold safety, reliability, sustainability and human rights (SDGs 3, 5, 7, 9, 10, 12, 16 and 17).” (GDC, p. 58)

Ratified Global Principle

Digital Infrastructure & Governance › Responsible AI Infrastructure & Governance

“We recognize that digital public goods, which include open-source software, open data, open artificial intelligence models, open standards and open content that adhere to privacy and other applicable international laws, standards and best practices and do no harm, empower societies and individuals to direct digital technologies to their development needs and can facilitate digital cooperation and investment.” (GDC, p. 14)

Ratified Global Principle

Digital Infrastructure & Governance › Responsible AI Infrastructure & Governance

“Support interoperability and compatibility of artificial intelligence governance approaches through sharing best practices and promoting common understanding (all SDGs).” (GDC, 55b)

Commitment & Action

Digital Infrastructure & Governance › Responsible AI Infrastructure & Governance

“Assess the future directions and implications of artificial intelligence systems and promote scientific understanding (all SDGs).” (GDC, p. 55a)

Commitment & Action

Human Rights & Inclusivity › Addressing Digital Divide Between States

“The inclusive participation of all States and other stakeholders is the cornerstone of this Compact. Our cooperation will close the digital divides within and between States and advance an equitable digital environment for all.” (GDC, p. 8a)

Ratified Global Principle

Human Rights & Inclusivity › Safeguarding Human Rights & Equity in the Digital Space

“This Compact is anchored in international law, including international human rights law. All human rights, including civil, political, economic, social and cultural rights, and fundamental freedoms, must be respected, protected and promoted online and offline. Our cooperation will harness digital technologies to advance all human rights, including the rights of the child, the rights of persons with disabilities and the right to development.” (GDC, p. 8c)

Ratified Global Principle

Human Rights & Inclusivity › Empowerment through Digital Skills, Education, and Innovation

“To fully harness the benefits of digital connectivity, we must ensure that people can meaningfully and securely use the Internet and safely navigate the digital space. We recognize the importance of digital skills and lifelong access to digital learning opportunities, taking into account the specific social, cultural and linguistic needs of each society and persons of all ages and backgrounds. We recognize the need to scale up international cooperation and financing for digital capacity development in developing countries and to support the development of local content and content relevant to local realities online and retain talent.” (GDC, p. 12)
